

**FOR IMMEDIATE RELEASE**

## **CLOVER TECHNOLOGIES GROUP ISSUES SECOND ANNUAL SUSTAINABILITY REPORT**

Clover cartridges use 79% less materials than OEM cartridges

---

CHICAGO, IL (April 4, 2011) Clover Technologies Group Inc., the world's leading provider of vertically integrated, closed loop environmental solutions has issued its second annual sustainability report. This second annual sustainability report outlines the major environmental impacts of Clover's North American business operations from January 1, 2010 through December 31, 2010. The report examines the entire life cycle of the products Clover collects and manufactures, reviews 2010 goals and achievements and establishes 2011 objectives.

Findings in the Report Include:

- Clover collected over 44 million units including cartridges, cell phones, small electronics and printer components
- Clover's reuse efforts conserved 803 billion BTUs of energy. The equivalent to 138,406 barrels of crude oil, enough energy to power over 18,000 single family homes for one entire year
- Clover's cartridges use 79% less materials than OEM cartridges and have a 44% smaller total environmental impact than OEM cartridges

"Since issuing our first sustainability report last year, Clover has moved towards a complete vertical integration in order to better provide a total environmental solution for the materials we manufacture. While we have grown tremendously during the last year, we have remained committed to the principle that we must meet the needs of the present without compromising the ability of future generations to meet their own needs." –Jim Cerkeski
